

Cloud Driven Digital Transformation Services

Our Advantage

- **Leverage proven approaches**
 - Microsoft Cloud Adoption Framework
 - Well Architected Framework
 - TOGAF
 - Agile/SCRUM methodologies
- **Utilize automation tools and accelerators**
 - Cost-effective solutions offers and incentives
 - Short delivery cycles *3 to 6 month turn around on standardized implementations*
- **Support environmentally sustainable initiatives**

Delivery Methodology

Understand
capability + capacity

Listen and Consult

Inspire and Design

Empower and
Achieve

Realize Value

Manage and
Optimize

Measure
consumption and
usage

Services + Solution Areas

- **Business Applications**
 - Accelerate customer intelligent business application transformation
- **Data + AI**
 - Power business decision making through modern data estate
- **Digital + App Innovation**
 - Modernize business processes through intelligent apps
- **Modern work**
 - Enable hybrid work
- **Azure Infrastructure**
 - Enable customer growth with migration
- **Staff Augmentation**
 - Onboard cloud architecture, engineering, and support resources

Business Applications

- **Accelerate Innovation with Low Code**

- Modernize operations at scale
- Differentiate services and experiences
- Accelerate your journey to cloud in a secure and governable way through adoption of low-code development tools

- **Modernize the Service Experience**

- Unify cross-functional support, resulting in a transformed arc of world-class customer experience

- **Solution Offerings**

- Dynamics 365
- Power Platform

Data + AI

- **Migrate and modernize your data estate**

- Low total cost of ownership, fully managed
- Meet you where you are on your journey: Migrate to Infrastructure-as-a-Service, fully managed Platform-as-a-Service, Hybrid, and NoSQL solutions
- Migrate on-premise SQL Server workloads in your data center to your on-demand cloud infrastructure
- Leverage **Xodus Data Services** to publish SQL Server data as restful services that can be easily consumed by modern applications

- **Data Ingestion**

- Use **XenHey**, our powerful data ingestion platform to pull data in and out of your enterprise

- **File Stream Migration**

- Migrate File Stream based solutions to Azure storage

- **Turnkey AI services**

Digital + App Innovation

- **Modernize enterprise apps**

- Migrate + Modernize
- Cloud Native App Integration
- Accelerate Developer Productivity

- **Specializations**

- **Azure Web Apps** - Modernize your web apps across this new cloud-native solution on a highly productive platform with fully managed services
- **Azure DevOps + GitHub**
- **Power Platform** Low Code Application Development

Infrastructure

- **Windows Server Migration**
- **Network Infrastructure Migration**
 - Move your workloads to Azure to enhance IT resiliency, operational efficiency, and optimize cost
 - Extend your on-premise environment to the cloud using **ExpressRoute** or VPN
 - Secure your cloud enterprise with **Azure Firewall** and NSGs
- **Virtual Desktop Infrastructure**
 - Quickly migrate Windows desktops and apps to Azure. Access your applications from virtually anywhere.

Case Studies

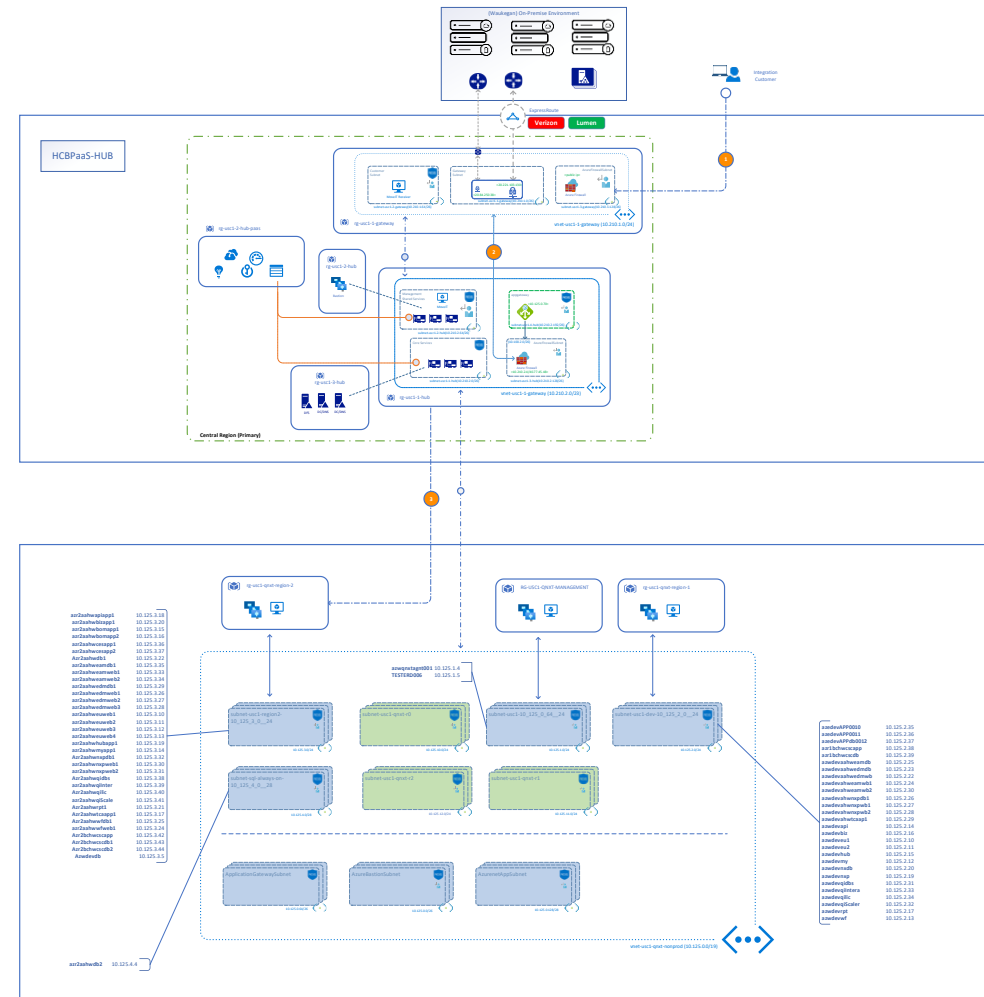

The following examples all ran from day zero to production in 6 months or less. They all utilized our AI assisted tools and accelerators to deliver a highly resilient scalable cloud solution. See sales contact for more details on the clients.

TMG Health

TMG Health is a healthcare BPaaS software vendor acquired by Cognizant Technologies. We were engaged to build a healthcare cloud platform for hosting their flagship products QNXT and Facets.

- Cloud Landing Zone design
- ExpressRoute Setup
- Site2Site VPN setup (backup hybrid connection)
- Hub & Spoke Model
- Automated VM deployment using **CloudWise** deploy and Azure Dev Ops
- API Management
- Application Gateway
- Site Recovery
- Splunk Integration

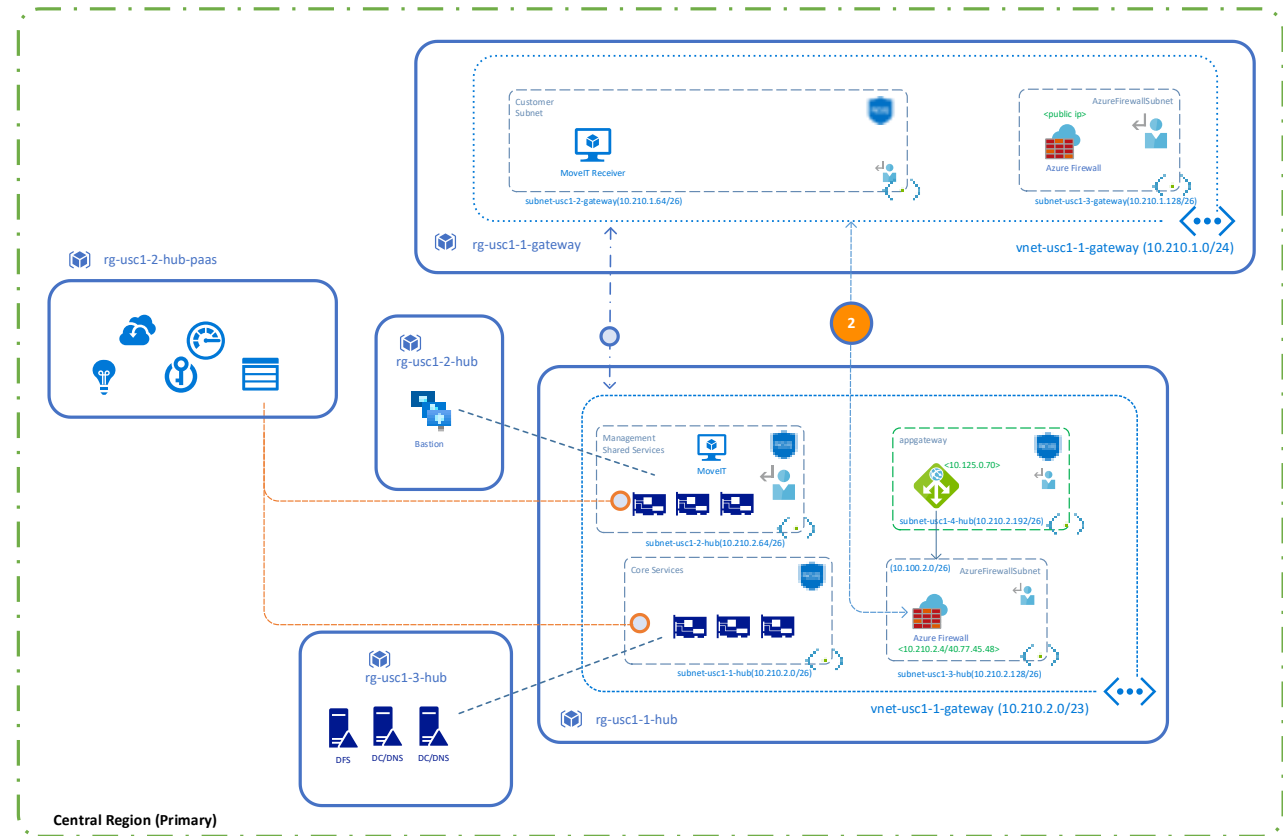

American Board of Surgeons

Part of the American Board of Medical Practitioners. AB Surgery handles all certification and licensing for all US based surgeons. We were engaged to migrate their legacy on-premise infrastructure to the cloud .

- Cloud Landing Zone design
- Point2Site VPN setup
- Hub & Spoke Model
- AD Migration for devices and users
- Application Gateway
- On-Premise to cloud infrastructure migration
- From manual deployment to Azure DevOps CI/CD automation for all sites and SQL databases
- Migration of on-premise SQL Server to Azure SQL
- Migration of file stream data to Azure Blob store

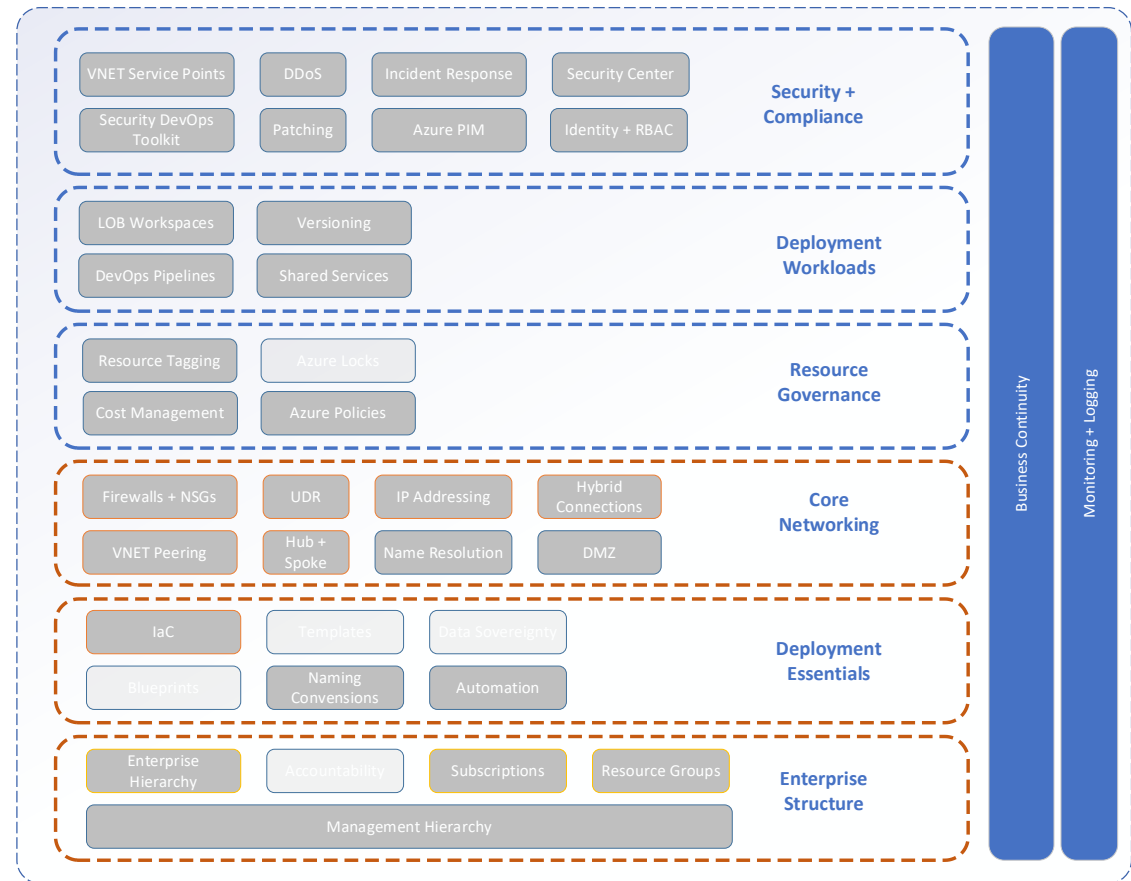

Innovate 1 Services

Innovate 1 Services is a global logistics firm that handles all identification services for several West African countries. We were engaged to migrate them to the cloud and implement an ERM system using Azure.

- Migration and consolidation of documents to Electronic Records Management system
- AD Migration for devices and users
- Modern workplace migration to Teams, Office 365, SharePoint
